PROFESSIONAL SUMMARY

Full Stack Software Engineer who builds web, mobile, desktop and game applications, with two production websites currently live. Experienced with Next.js, React, TypeScript, Node.js, PostgreSQL and Supabase, and with building local AI systems using RAG and open-source language models. Focused on practical, maintainable software, from database design to deployment.

EDUCATION

Istanbul Aydın University
B.Sc. in Software Engineering (English-medium)
Istanbul Aydın University
English Preparatory Program

Istanbul, Türkiye
Sep. 2022 – Jun. 2026
Istanbul, Türkiye
Sep. 2021 – Jun. 2022

EXPERIENCE

Software Engineer Intern

Jul. 2026

Cabitas

Istanbul, Türkiye

- Continued developing and maintaining FileMaker-based business applications and their database systems.
- Worked on database design, data structures and data management in FileMaker.

Software Engineer Intern

Sep. 2024 – Jun. 2025

Cabitas

Istanbul, Türkiye

- Built new features for and maintained FileMaker-based business applications used in the company's daily operations.
- Worked on the database structures, data management and application logic behind these applications.
- Collaborated with the development team on implementation, testing and maintenance tasks.

PROJECTS

ARTIFICIAL INTELLIGENCE

- Nova | Voice AI Agent** | *Python, FastAPI, Whisper, RAG, Qwen2.5, Piper, Docker* | [GitHub](#) 2026
 - Built a bilingual (Turkish/English) voice assistant that runs fully locally on open-source components: speech recognition, retrieval-augmented generation (RAG), a local LLM and text-to-speech.
 - Grounded answers in company documents, a live SQL product database and external APIs; added code-based calculation and number verification layers to block hallucinated facts.
 - Scored 27/27 on the accuracy and hallucination evaluation, 38/38 on multi-turn conversation scenarios and 24/24 on language detection, with a median perceived latency of 2.8–4.2 s.

FULL STACK & WEB

- Special Education Management System** | *Next.js, TypeScript, React, Supabase* | [GitHub](#) 2026
 - Developed a management platform for special education centers covering students, teachers, sessions, payments, scheduling, financial operations, reporting and Excel data import.
 - Implemented teacher earnings, installment payments, session conflict detection, calendar management and financial reporting workflows.
- Konyap Website & CMS** | *React, Supabase, Tailwind CSS* | [Website](#) | [GitHub](#) 2026
 - Built a production corporate website with a custom CMS, so the company manages its projects and site content without a developer.
- Ober Yapı Website & CMS** | *React, Supabase, Tailwind CSS, Render* | [Website](#) 2026
 - Built a responsive corporate website with a custom content management system and set up its deployment and hosting on Render.
- EasyHome** | *Node.js, Express.js, MongoDB* | [GitHub](#) 2024
 - Built a full-stack property rental platform with authentication, listing management, database integration and CRUD operations.
- Personal Portfolio** | *Next.js, TypeScript, Tailwind CSS* | [Website](#) | [GitHub](#) 2026
 - Designed and built a responsive, bilingual (Turkish/English) portfolio showcasing my projects, technical skills and experience.

MOBILE APPLICATIONS

- MyFitly** | *React Native, Expo, Supabase* | [GitHub](#) 2025
 - Developed a fitness and nutrition app with workout planning, calorie and nutrition tracking, and body metrics.

- **Workify AI** | *React Native, Expo, AI* | [GitHub](#) 2025
 - Built an offline-first task management app with productivity workflows, calendar features and AI-powered functionality.

DESKTOP & AUTOMATION

- **FlowShot** | *Python, PySide6* | [GitHub](#) 2026
 - Developed a desktop workflow recorder that captures user interactions and automatically generates step-by-step visual documentation.
- **QRReader** | *Python, OpenCV, pandas* | [GitHub](#) 2026
 - Built an automation tool that extracts QR code and UUID data from PDF documents and exports structured results to Excel.

GAME DEVELOPMENT

- **EscapeRoom** | *Unity, C#, Netcode, Relay* | [GitHub](#) 2026
 - Developed an online co-op escape room game for up to four players with room-code matchmaking, synchronized puzzles and real-time multiplayer using Unity Netcode and Relay.
- **Şükran Mobile Card Game** | *React Native, Expo, TypeScript, Firebase* | [GitHub](#) 2026
 - Developed a turn-based mobile card game with custom rules, card interactions, player turns and game-state logic.
- **Car Escape** | *Unity, C#* | [GitHub](#) 2026
 - Developed an arcade-style car escape game with player controls, obstacles, environmental interactions and core gameplay mechanics.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C#, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs

Mobile: React Native, Expo

Databases & Backend Services: PostgreSQL, MongoDB, Supabase, Firebase

AI: RAG, LLM integration, Whisper, Ollama

Game Development: Unity

Tools & Platforms: Git, GitHub, Docker, Postman, Vercel, Render, FileMaker

Practices: Full Stack Development, API Integration, Responsive Design, Database Management, AI-Assisted Development

CERTIFICATIONS

Fundamentals of Agents – Hugging Face Oct. 2026

Internship Completion Certificate – Cabitas Jun. 2025

CodeTheFuture – Globally Check Feb. 2025

LANGUAGES

Turkish: Native **English:** Intermediate

ADDITIONAL INFORMATION

Military Service: September 2026
